## Job Details

**Designation:** Data Engineer / Digital Business Reform Department (IT)

**Type:** Information Technology

**Place of Posting:** Tokyo, Japan

**Job Details:** ■Company Overview  
Fast Retailing Group aims to become the world's best apparel group by transforming its business operations to "Digital Consumer Retail Company" beyond the retail framework.  
We are actively investing in and focusing on Digitizing our operations and transforming the business globally. The IT Department at Fast Retailing is responsible for handling Ecommerce platforms, mobile shopping platforms, inventory management and customer data visualization.  
In Fast Retailing we are building microservices to support both store operations and e-commerce operations. Our microservices are core parts of our business.

We offer our talents a career journey in which the goal is to become not just a tech leader, but to be a business leader. By providing diverse experiences at different roles, we expect you to develop a wide view of how the company works and lead Fast Retailing Group with a strong business acumen.

■We are open for the following positions

- Software Developer
- Data Engineer
- Front-end Engineer
- Backend Engineer
- Mobile Application Engineer
- QA Engineer
- Data Scientist

You will submit your preference but we cannot guarantee the position; we will assess your eligibility through the screening process and will decide your position after joining the company.

■What we can offer

- Your first job in Tokyo, Japan

- Flexible working hours
- Opportunities to work on challenging projects that have a high global impact on Japan's biggest apparel company
- Opportunities to choose your own technology stack and improve your skills
- Company discount on UNIQLO, GU and Theory products

#### ■Process

- Online application
- Resume screening
- Online tests (Data Structures and algorithms, aptitude and personality test)
- Online or face-to-face interview (1-3 times) (including technical interview)
- Final Officer Interview

#### ■Data Engineer

##### ■Overview

FAST RETAILING Co., Ltd. is constantly improving the user experience with the aim of improving the user experience, and we believe that data science will make a major contribution to it. There are a wide variety of data sources such as actual stores, e-commerce, mission-critical systems, and microservices of various brands and countries under Fast Retailing. It is imperative for data engineers to create a smart big data platform that can collect and store vast amounts of data safely and accurately while using the latest technology, and to quickly provide high-quality data to data scientists.

As a data engineer, your mission would be building a smart big data infrastructure that can collect and store huge data in the safe, correct approach, and providing high quality data to data scientists quickly using cutting-edge data technology.

##### ■Expected role

- Construction and operation of big data infrastructure such as Data Lake / Data Catalog / DWH
- Development of data common processing program
- Construction and operation of batch real-time processing system for analysis
- Construction and operation of anomaly detection infrastructure

##### ■Preferred skills and experiences

- Data analysis backend processing using statistical methods in cloud infrastructure and its operation experience
- Experience in data engineering/ science or other related backend development/ operations
- Cloud familiarity with hadoop ecosystem or worked with large data storage or warehousing solutions including NoSQL, AWS EMR / GCP Bigquery, Elasticsearch, data marts, data lakes, etc.
- Worked with at least one of programming languages including Python, Scala, Java.

**International:** Yes

**Joining By:** 1 September 2023
