DATA SCIENTIST

As a recent graduate with a strong foundation in machine learning and data science, I have worked on several personal projects with real datasets using SQL and Python. In my projects, I have showcased my skills in **data cleaning**, **data visualizations**, and **modeling**. I've experience implementing deep learning architectures from reasearch papers and have a strong understanding of the underlying mathematics.

PROJECTS

ReVision	<i>Python, Numpy, TensorFlow, Pytorch, CLI</i>	Source Code
<ul style="list-style-type: none">Created a personal project called ReVision to learn the concepts and implementation details of groundbreaking computer vision papers.Utilized popular deep learning frameworks such as Tensorflow and PyTorch to implement the architectures of seminal papers like LeNet, AlexNet, VGG, ResNet, Inception, EfficientNet, etc.		
NLP With Disaster Tweets	<i>Python, TensorFlow, NLP, Text Vectorization, LSTM, GRU, CNN</i>	Source Code
<ul style="list-style-type: none">Developed NLP models to classify disaster and non-disaster tweets using text vectorization, various word embeddings, and deep learning models including LSTM, GRU, their bidirectional variants, and 1D CNNsUtilized the Universal Sentence Encoder to create embeddings on both the character and word levels, and implemented a multivariate model using the functional API of TensorFlow.		
IBM Data Analytics Capstone Project	<i>Python, pandas, Matplotlib, Web Scraping, API, Dashboard</i>	
<ul style="list-style-type: none">Gathered and analyzed data from various sources, including API and web scraping. Conducted exploratory data analysis and wrangling to prepare the data for further analysis.Built a dynamic dashboard to extract valuable insights from the collected data, and effectively communicated the findings to others through an engaging presentation.		
Tableau Dashboards	<i>Tableau, Web Scraping, Web API, BeautifulSoup</i>	Music Books
<ul style="list-style-type: none">Created an interactive Tableau viz showcasing my Spotify streaming history over several years, using data blending and calculated fields to present key insights.Utilized web scraping techniques to extract my book reading history from Goodreads and created an interactive Tableau dashboard to analyze and visualize the data.
