

# Job Notification Form, IIT Delhi

## Company Overview

**Name:** Jarvis

**Website:** [Javis.ai](https://javis.ai)

**Company Type:** Information Technology

**Description:** Jarvis is an “Enterprise Works Platform” that integrates multiple systems both within and across organizations to enable users to get their work done easily over a single interface.

Companies today are sitting on tons of data scattered across multiple systems & geographies. 20 years of SaaS and buying ‘narrow point solutions’ has resulted in daily friction for employees in navigating these systems. Jarvis has solved this by powering a new-age Works platform, a ‘Systems of Delivery’ that connects multiple systems & organizations to enable users to work better.

From enabling teams to analyzing company data & access trusted AI driven insights on- the-go, to collecting orders from retailers; distributors and to designing complex; efficient workflows - businesses use our Works platform in a variety of ways. We have three offices in Mumbai, Gurgaon & Bangalore and operations in 5 countries. We are committed to foster a diverse and inclusive workplace regardless of gender, race, colour, religion, caste, sexual orientation, disability or nationality. We strongly believe that when people of different backgrounds, experiences and perspectives come together, they create a pleasant; supportive workplace that leads to self - improvement and better products for our clients.

Come do the best work of your life here at Jarvis; play your part in changing the way people work.

## Job Details

**Designation:** Machine Learning Engineer I

**Type:** Core (Technical)

**Place of Posting:** Bangalore (Preferred). Mumbai / Gurgaon (Optional)

**Job Details:** Jarvis is looking for a Machine Learning Engineer who will support the product with insights gained from analyzing multiple sources of data.

Your main focus will be to work with stakeholders to identify opportunities for leveraging data to drive business solutions.

Responsibilities:

- Mine and analyze data from multiple databases to drive optimization and improvement of product development and business strategies
- Access the effectiveness and accuracy of new data sources and data gathering techniques
- Develop custom data models and algorithms to apply to data sets

- Implement analytical models into production by collaborating with software developers and machine learning engineers
- Coordinate with internal teams to understand user requirements and provide technical solutions
- Proactively communicate with internal teams to quickly identify and resolve issues
- Ensure that development is world class and finished within turnaround time
- Bring your thinking, strategies, and ideas to advance our company's values, unique culture, and vision for the future.

Requirements:

- 0+ years of related experience using Python
- B.E. / B.Tech / M.Tech / Masters degree in Computer Science, Information Technology or equivalent
- Strong academic record with a CGPA of 7.5 and above in UG and PG
- Basic knowledge of Python and its libraries
- Good knowledge of Data Structures, OOPS and DBMS / RDBMS concepts
- Knowledge of any database query language like MySQL and its use in data gathering or cleaning
- Basic Knowledge of statistical analysis and applied mathematics
- Basic understanding of AI and ML concepts
- Good knowledge of Object-relational mapping
- Must possess analytical and problem-solving skills
- Self-motivated, detail oriented and proactive in seeking solutions
- Outstanding verbal & written communication skills with a proven experience at building relationships
- Ability to be organized and to work well under pressure with tact & poise
- Evidence that you are a Top Performer in your current organization
- A sharp focus on your goals and a belief that your daily, weekly and monthly activities will help you achieve them

**Joining By:** 5 June 2023
