

# Job Notification Form, IIT Delhi

## Company Overview

**Name:** Jarvis

**Website:** [Javis.ai](https://javis.ai)

**Company Type:** Information Technology

**Description:** Jarvis is an “Enterprise Works Platform” that integrates multiple systems both within and across organizations to enable users to get their work done easily over a single interface.

Companies today are sitting on tons of data scattered across multiple systems & geographies. 20 years of SaaS and buying ‘narrow point solutions’ has resulted in daily friction for employees in navigating these systems. Jarvis has solved this by powering a new-age Works platform, a ‘Systems of Delivery’ that connects multiple systems & organizations to enable users to work better.

From enabling teams to analyzing company data & access trusted AI driven insights on- the-go, to collecting orders from retailers; distributors and to designing complex; efficient workflows - businesses use our Works platform in a variety of ways. We have three offices in Mumbai, Gurgaon & Bangalore and operations in 5 countries. We are committed to foster a diverse and inclusive workplace regardless of gender, race, colour, religion, caste, sexual orientation, disability or nationality. We strongly believe that when people of different backgrounds, experiences and perspectives come together, they create a pleasant; supportive workplace that leads to self - improvement and better products for our clients.

Come do the best work of your life here at Jarvis; play your part in changing the way people work.

## Job Details

**Designation:** Software Development Engineer I (Front End)

**Type:** Core (Technical)

**Place of Posting:** Bangalore (Preferred). Mumbai / Gurgaon (Optional)

**Job Details:** Jarvis is looking for a Front End Developer to translate designs into crisp code and build thoughtful experiences centered around our customers.

Your main focus will be to create the desired functional experience for the end-user.

Responsibilities:

- Determine the structure and design of web pages
- Ensure User Experience determines the design choices
- Develop the latest user-facing features using React JS
- Design a modern highly responsive web-based user interface
- Build reusable components and font-end libraries for future use

- Translate designs and wireframes into high-quality code
- Implement business needs and feature modification requests
- Proactively communicate with internal teams to quickly identify & resolve issues
- Support the architecture and design decisions within the team
- Ensure quality automation using QA processes and prevent any potential bugs
- Bring your thinking, strategies, and ideas to advance our company's values, unique culture, and vision for the future.

#### Requirements:

- 0+ years of related work experience as a Front End developer
- B.E. / B.Tech / M.Tech / Masters degree in Computer Science, Information Technology or equivalent
- Strong academic record with a minimum CGPA of 7.5 & above in UG & PG is a must
- Proficiency in React JS, Redux and its core principles
- Basic understanding of modern front end build pipelines and tools
- Good understanding of HTML, CSS and JavaScript
- Knowledge of web frameworks and RESTful APIs
- Good knowledge of Data Structures and OOPS concepts
- Knowledge of any database query language like MySQL
- Self-motivated, detail oriented and proactive in seeking solutions
- Outstanding verbal & written communication skills with a proven experience at building relationships
- Ability to be organized and to work well under pressure with tact & poise
- Evidence that you are a Top Performer in your current organization
- A sharp focus on your goals and a belief that your daily, weekly and monthly activities will help you achieve them

**Joining By:** 5 June 2023
