Job Description

We are looking for a highly motivated candidate who can think critically and exercise good judgment in a dynamic, fast-paced environment to drive our mission of Simplifying IT.

You will be responsible for driving product and user experience improvements through hands-on testing. You will be exposed to a diverse range of state-of-the-art technologies including enterprise networking equipment, security cameras, VoIP phones, and access control systems. As the bridge between technical support and development teams, you are expected to have strong communication skills and a good business sense for effective prioritization. The ideal candidate can independently learn highly technical topics and articulate how they relate to user experience in simple terms.
This incredibly engaging role consists of QA testing and conducting UX audits. As

such, you should have a proven track record of managing projects and a passion for technology.

Responsibilities:

• Identify the best opportunities to improve user experience and product quality
• Perform hands-on testing and UX audits
• Collaborate with the technical support team to identify opportunities for quality testing
• Create test-cases that can be directly used to measure user experience
• Collaborate with technical support teams to identify QA opportunities based on incoming support requests
• Compile reports that indicate how improvement opportunities by relating them to user experience
• Liaison between product development and technical support teams
• Perform external research to support proposed improvements
• Proactively identify potential risks and focus on preventive action
• Track how your contributions have affected the brand narrative

Required Skills:

• Understanding of computer networking
• Ability to articulate how technical topics contribute to overall user experience
• Proven ability to independently work and learn new technologies
• High Understanding of business cases and processes
• Passion for technology
• Ability to exercise good judgment under pressure

Qualifications:

• Bachelor's degree or equivalent experience in Engineering
